# About our company

We are a Polish manufacturer of knitted children's blankets, made exclusively from natural fibers. Our production is based on the highest quality materials, ensuring comfort and safety of the youngest.

We focus on creating products that are both soft and friendly to the sensitive skin of a child. They are as well ecological, ensuring our planet's well-being. Our blankets are a combination of tradition and modernity, adapted to the current needs of the market and expectations of parents.

As the only knitting factory in Poland, that specializes exclusively in the production of children's blankets, it allows us to fully focus on quality and innovation in this area. Our production capacity currently amounts to 500 pieces per day, with the possibility of increasing it in the event of higher demand. Thanks to our extensive machinery park and flexibility, we are able to quickly respond to changes in trends and quickly switch production to client's needs.

It allows us not only to introduce new blankets to the market, but also to stay ahead of the competition, satisfying the needs of our customers in the latest fashion trends.

# Why are our blankets the best choice?

**100% natural fibers** – Our blankets are fully in line with eco trends and are a safe choice for toddlers, providing comfort and protection for their sensitive skin.

**Unique yarn blend** – The use of a special, unique yarn blend, available exclusively in our production, provides exceptional softness, which makes our blankets extremely delicate and pleasant to the touch.

**Premium option: merino wool** – For the most demanding customers, we offer merino wool blankets, characterized by the highest quality and excellent thermoregulatory and breathable properties.

**Wide range of sizes and patterns** – We offer a wide selection of blankets, from light wraps to thick winter blankets, which meet various customer needs and preferences.

**Silver ions** – Thanks to the use of silver ions, our blankets gain antibacterial and antifungal properties, which provides additional protection and comfort of use.

**Washing and chemical treatment process** – Each of our products undergoes a special treatment that stabilizes the fabric, gives it fluffiness and ensures long-lasting softness.

**Color personalization** – We offer complete freedom in choosing colours, adapting products to individual customer preferences.

**We offer cooperation in two flexible models:**

1. Production of baby blankets according to your specifications
2. Selection from the structures proposed by us

# Production of baby blankets according to your specifications

We offer full production of blankets tailored to the individual needs of your customers, including:

**Designs** – we will create unique designs, that will meet the requirements of your brand and market needs.

**Material** – we offer a wide selection of materials, including natural fibers such as cotton, bamboo viscose or merino wool.

**Dimensions** – we will adjust the dimensions of the blankets to your specifications, taking into account your size preferences.

**Colours** – we provide full flexibility in choosing colours so that the blankets perfectly match your brand's offer.

# Selection from structures proposed by us

In this model, you choose from ready-made designs that we can include in your offer. We offer flexibility in terms of modification, allowing:

**Changing the dimensions of the blanket**  
- adapting to the specific needs of your market or target group.

**Choice of colours** - you can choose colours from the available palette to match the products to your offer.

In both cases, the finished products will carry your branding, ensuring consistency and helping you stand out in the market.

## Full production and delivery process:

We deliver ready-to-sell children's blankets, providing a simple and convenient cooperation model:

**Preparation of projects** - Our studio prepares projects that will meet your requirements.

**Sewing prototypes** - After preparation process, we sew prototypes, that you accept before starting production.

**Production implementation** - The entire production process takes place on our side, which saves time and provides full control over quality.

**Collective and individual packaging** - The blankets are appropriately packed, both collectively and individually, ready for sale.

**Delivery to your warehouse** - We deliver products according to the agreed schedule, eliminating the risk of stock shortages.

For years, we have been cooperating with B2B clients in the production and distribution of children's blankets, which allows us to perfectly understand your formal, logistical and production requirements.

This ensures that our cooperation will be smooth and trouble-free.

# Fabrics

In our production of baby blankets, we use the highest quality yarns that ensure comfort, safety and durability.

We offer the following types of yarns:

- **100% cotton** - natural, delicate and breathable, perfect for sensitive baby's skin.
- **100% bamboo viscose** - soft, hypoallergenic and skin-friendly, characterized by antibacterial and moisture-wicking properties.
- **A mixture of 50% cotton, 50% bamboo viscose** - a combination of two natural fibers, ensuring softness, durability and breathability.
- **100% merino wool** - exceptionally soft and warm, naturally regulates body temperature, perfect for colder days.

**Knitting** is a method of producing textile fabrics that involves interlacing stitches of yarn with loops of the same or other yarn. Knitted fabric is more elastic than fabric and is usually more breathable.

What distinguishes knitted blankets from fabric blankets is the possibility of using convex weaves, such as braids or Arans, and openwork weaves, which give knitwear unique look and structure.

The production of blankets takes place on flat knitting machines, which enable precise creation of such patterns and structures.

# 100% Cotton

Cotton is one of the most popular and versatile natural fibers, which is characterized by many valuable properties.

Here is a detailed description of cotton properties:

**Soft** - Cotton is naturally soft and fluffy, which makes it pleasant to touch and comfortable to wear. This is one of its most valued qualities, especially in clothing and bedding.

**Natural fiber** - Cotton comes from the cotton plant, and its fibers are 100% natural, which makes it an ecological and biodegradable material. This is an important feature, especially in the context of the growing demand for environmentally friendly products.

**Absorbent** - Thanks to the air spaces between the fibers, cotton has excellent absorbent properties. It can effectively wick moisture away from the skin, making children comfortable at all times.

**Breathable** - Cotton allows the skin to breathe. This makes it an ideal choice for warm days, as it helps maintain a comfortable body temperature, reducing overheating.

**Durable** - Cotton is a very durable material, and what's more, its strength increases when wet. This property makes it resistant to wear and tear, allowing products made from it to last a long time.

**Easy to care for** - Cotton can be machine-washed without worrying about it getting damaged.

# 100% Bamboo viscose

Bamboo viscose is a unique material that is gaining popularity, especially in products such as baby blankets. It has many advantages that ensure comfort of use and safety for the delicate skin of little ones.

Here are the detailed properties of this material and the benefits of using it:

**Antibacterial and bacteriostatic properties**  
- Bamboo viscose naturally eliminates unwanted bacteria, and also inhibits the growth and multiplication of microorganisms. This makes the material hygienic and prevents the formation of mold, which is especially important in products intended for children.

18

19

**Counteracts unpleasant odours** – Due to its antibacterial properties, bamboo viscose prevents the growth of bacteria that can lead to unpleasant odours, ensuring long-lasting freshness.

**Dries quickly and releases moisture well** – Bamboo viscose effectively wicks away moisture, making the material quick-drying. In the case of children's blankets, this is of great importance, as it helps keep the baby's skin dry, providing comfort and protection against overheating.

**Breathable and thermoregulatory** – Bamboo viscose perfectly regulates temperature, removing excess heat and preventing overheating. Thanks to this property, the child's skin remains at a comfortable temperature, which is especially important during sleep.

**Soft and delicate to the touch** – Bamboo viscose feels softer and more slippery than other materials, which provides exceptional comfort, ideal for sensitive baby skin.

**Hypoallergenic** – Bamboo viscose is a material that does not cause allergic reactions, making it safe, even for very sensitive skin of babies and children.

**Easy to maintain** – Bamboo viscose material is easy to keep clean, making it a convenient solution for everyday care of products such as blankets.

## Blend 50% cotton, 50% bamboo viscose

In order to combine the best properties of both fibers, we also use a yarn blend composed of 50% cotton and 50% bamboo.

It takes advantage of cotton's strength, softness, and absorbency, along with bamboo's breathability, smooth texture, and hypoallergenic qualities. Such a blend allows us to create products that combine these properties in a unique way, providing comfort, durability and safety. What's more, this yarn can be twisted and dyed according to the customer's individual preferences, so that the products are fully personalized and tailored to your needs.

This blend creates the highest quality products, making them an excellent choice for parents seeking the best for their children. Thanks to these properties, bamboo blankets provide not only coziness, but also contribute to the child's health and well-being.

# 100% Merino wool

Merino wool comes from merino sheep that pasture in the highlands of Australia and New Zealand. It has extraordinary properties that make it one of the most valued materials, especially in the production of children's clothing and accessories.

## Why choose merino wool?

**Thermoregulation** - Merino wool is an active fiber that responds to changes in body temperature, helping to maintain thermal comfort. It provides warmth in winter and cooling in summer, making merino blankets an ideal solution for children who have variable thermal needs.

**Ecology / Biodegradability** - Merino wool is a natural fiber that decomposes in the soil when thrown away, releasing valuable nutrients. It is therefore environmentally friendly, biodegradable and does not harm the planet.

**Softness** - Merino wool fibers are very thin and flexible, which makes them much softer and more delicate than traditional wool. Blankets made of this material are exceptionally comfortable, delicate and luxurious to the touch, ideal for contact with children's sensitive skin.

**Naturally breathable** - Merino wool has the unique ability to absorb and wick away moisture. Thanks to this property, it prevents overheating or sweating, which ensures optimal thermal comfort throughout the day.

24

25

**Hypoallergenic** - Merino wool is exceptionally gentle to the skin and does not cause irritation, making it an ideal choice for babies and children with sensitive or allergy-prone skin.

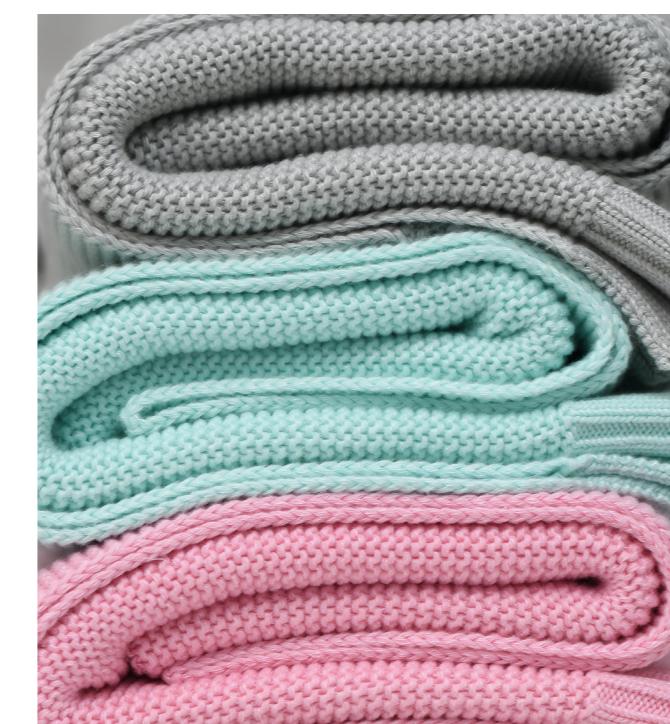

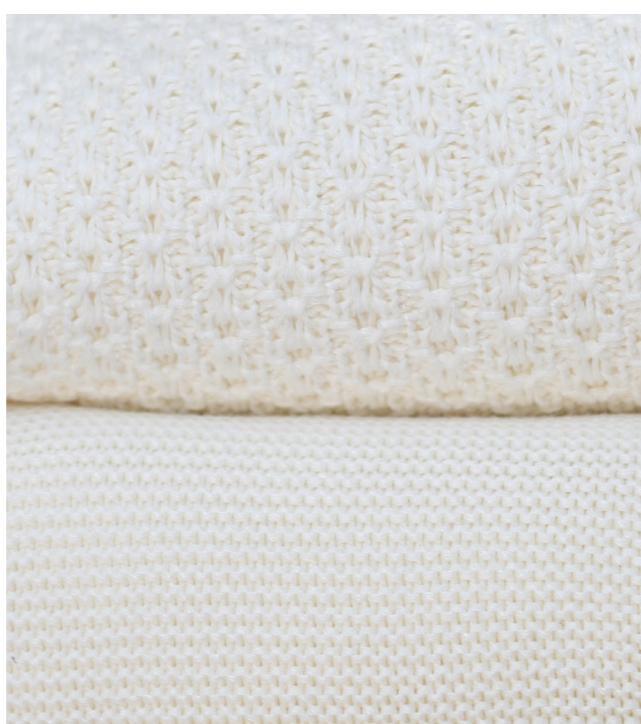

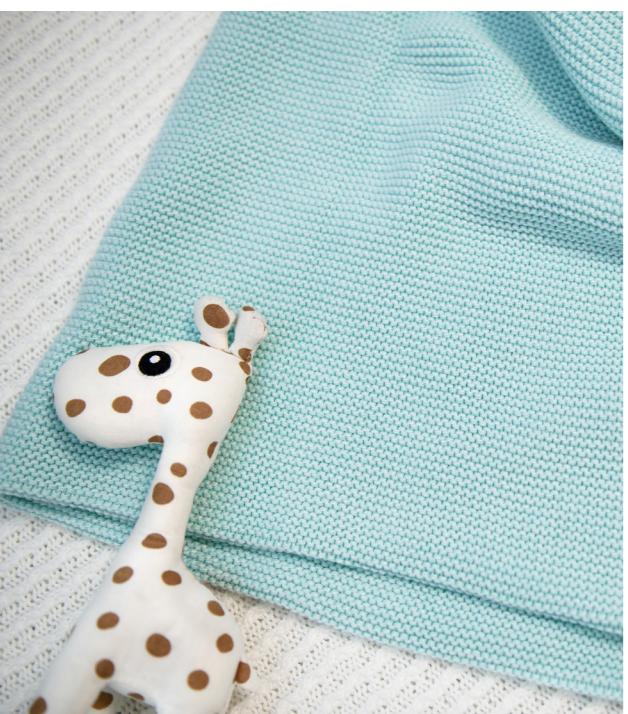

**Does not absorb odours** - Merino wool copes well with moisture, which prevents the formation of unpleasant odours. Thanks to this, products made of merino wool require infrequent washing - just air them out to be like new.

**Stain resistance** - Merino wool fibres have a natural protective layer that helps prevent the absorption of stains. Additionally, merino wool attracts less dust and dirt due to its low tendency to accumulate electrostatic charges.

**Easy to care for** - Lanolin, which covers merino fibres, inhibits the growth of bacteria, mites and fungi, making merino products easy to care for. Dirt does not quickly penetrate the material, which makes merino wool blankets easy to keep clean.

**Crease resistance and elasticity** - Merino wool is naturally elastic, and its fibers have the ability to return to their original shape after being bent, which makes it crease resistant. Blankets made of this material retain their aesthetic appearance and are easy to care for.

Merino wool is a unique material that combines comfort, ecology and durability. It is an excellent choice for the production of blankets for babies and small children.

Please contact us to discuss the details and find the best solutions that will meet your expectations.
